

# Poster Presentations

## Opto-Electronics:

- S. ANDERS et al. (TU Wien): "Electrically Pumped Quantum Cascade Ring Lasers" – **page 77**
- A. ANDREEV et al. (JKU Linz): "Anisotropic Optoelectronic Properties of Self-Assembled Nano-Wires of Para-Sexiphenyl Grown by Hot Wall Epitaxy" – **page 81**
- J. DARMO et al. (TU Wien): "New Generation of Photoconductive Terahertz Emitters" – **page 85**
- G. KOCHER-OBERLEHNER et al. (JKU Linz): "Enhanced Luminescence of Erbium Doped Silicon Due to Hydrogen" – **page 89**
- T. MÜLLER et al. (TU Wien): "Time-Resolved Measurement of Intersubband Population Dynamics" – **page 93**
- F.F. SCHREY et al. (TU Wien): "Dynamics between Electronic Levels in InAs Quantum Dots" – **page 97**
- T. SCHWARZL et al. (JKU Linz): "Comparison of MBE Grown IV–VI Microcavity Lasers for the Mid-Infrared with Active Regions of Different Dimensionality" – **page 103**

## IV-VI Semiconductors:

- A. HALLBAUER et al. (JKU Linz): "Molecular Beam Epitaxy of  $\text{PbSe}_{1-x}\text{Te}_x$  for Strain Engineering in IV-VI Semiconductor Heterostructures" – **page 109**
- A. RAAB et al. (JKU Linz): "Intermixing and Shape Transitions of PbSe Quantum Dots During Overgrowth" – **page 113**

## Silicon and SiGe:

- H. LICHTENBERGER et al. (JKU Linz): "Transient-Enhanced Surface Diffusion on Natural-Oxide-Covered Si(001) Templates During Vacuum Annealing" – **page 119**
- M. MÜHLBERGER et al. (JKU Linz): "Growth Instabilities in Si/SiGe Homo- and Heteroepitaxy" – **page 123**
- M. MÜHLBERGER et al. (JKU Linz): "High-mobility Strained Si for Spintronics Applications" – **page 127**
- Z. ZHONG et al. (JKU Linz): "Laterally Ordered Ge Islands on the Pre-Patterned Si (001) Substrates" – **page 131**

## Direct Write Processes:

- W. BREZNA et al. (TU Wien): "Focused Ion Beam Induced Damage in Silicon Investigated with Scanning Capacitance Microscopy" – **page 137**
- A. LUGSTEIN et al. (TU Wien): "Post-Process CMOS Channel Profile Tailoring with Focused Ion Beams" – **page 143**

H.D. WANZENBOECK et al. (TU Wien): "Deposition Mechanism of Direct-Write Processes — An Application-Oriented Approach to Custom-Tailored Material Properties" – **page 149**

### **Insulating Films:**

S. HARASEK et al. (TU Wien): "Zirconium Dioxide Thin Films for Microelectronics Deposited by Metal Organic Chemical Vapor Deposition" – **page 157**

### **Transport Phenomena:**

M. KAST et al. (TU Wien): "Transport through Wannier-Stark States in Biased Finite Superlattices" – **page 165**

### **Sensors:**

F. KEPLINGER et al. (TU Wien): "Simulated and Measured Characteristic of a Micromachined Cantilever Sensor" – **page 173**

J.H. NIEUWENHUIS et al. (TU Wien): "Novel Flow-Cell To Create A Sheath Flow With Adaptable Sample Flow Dimensions" – **page 177**

P. SVASEK et al. (TU Wien): "Micromachined Mixing Device for FTIR-Spectroscopy" – **page 183**

### **ESD Protection Devices:**

M. BLAHO et al. (TU Wien): " Study of Internal Behavior of BCD ESD Protection Devices under TLP and Very-Fast TLP Stress" – **page 191**
